## 2024 – What a Year

- We celebrated the company's 50th anniversary,
- invited customers and friends to our in-house exhibition in Niedernberg,
- presented a new model ABI MOBILRAM TM 16 machine
- and much more.

An eventful year is coming to an end, and we would like to look back with you on the most important events.

In September, we welcomed numerous guests to our in-house exhibition in Niedernberg. We also celebrated the 50<sup>th</sup> anniversary of ABI in this beautiful setting.

There was plenty on offer, including a machine exhibition, machine demonstrations, factory tours, presentations on innovations and product developments and a panel discussion on current topics such

as decarbonization and the CO<sub>2</sub> footprint. There were two very relaxed evening events with music.

In the run-up to the in-house exhibition, we asked our guests not to bring us any gifts, but to convert the intended gift into a donation for the local foundation "Hilfe in Not Obernburg" (Help in crisis Obernburg). The foundation supports people who are in need through no fault of their own. The entire committee works on a voluntary basis, so every cent goes to those in need. We were delighted that a total of 5,855 euros

was raised, and we rounded the sum up to 10,000 euros. Many thanks to all those that donated.

There was a lot to see at the in-house exhibition. The new model ABI MOBILRAM TM 16 was presented, and the new working radio remote control was shown during a practical demonstration. From the DELMAG product line, we presented assistance systems such as Kelly bar visualization and the auger cleaner for Kelly drilling.

The interest in our products and the company pleased us very much and we want to continue to be a reliable partner for you in the future. For this reason, we have founded a new pre-development department and invested in a further facility: No. 4 in Niedernberg.

The overall political and economic developments will present us one or two challenges in the future. With our new structure, we believe we are well prepared for all the challenges ahead and together with you we will master them.

As 2025 casts its shadow ahead, we are preparing for bauma and will have a lot to offer you in Munich. On the occasion of ABI's 50<sup>th</sup> anniversary, the machine presentation will focus on ABI products. See you at bauma.

The ABI Gruppe team

## Impressions from the In-house Exhibition

We have staged our machines.

From left to right: the new TM 16 with vibrator MRZV 15SD, TM 20 on carrier SR 30 with many extras, STS mixing station, TM 26 with drill drive RHP 150S and TM 22 with Twinmix soil mixing auger TMBA 2-10000.

DELMAG drill rigs.  
From large to small: RH 38 with rotary head and a box-type drill, RH 34 with VDW equipment and the compact model RH 14 with Kelly drilling equipment.

A visit from Sweden.  
The subsidiary SPD from Sala presented its T13 with a down-the-hole hammer and remote control.

View of our machine yard. Between the TM 16 and the TM 13 Hybrid.

### Premiere for ABI MOBILRAM TM 16.

The new machine model from the ABI product range TM 16 with vibrator MRZV 15SD, a specialist when it comes to producing stone columns. The TM 16 is mounted on a 340 kW carrier and offers usable length of approx. 16.7 m (depending on attachment). We look forward to presenting the TM 16 to a broad audience at bauma in Munich.

### Lectures on innovations and current topics in special civil engineering.

Various specialist presentations and a panel discussion took place at Plant 1 in Boschstrasse. The speakers were well prepared, and the presentations were well attended.

Machine demonstrations TM 20 and RH 27. Machine demonstrations were very well received. The new working radio remote control was presented on the TM 20 and the DELMAG assistance systems and the Kelly auger cleaner were shown in action on the RH 27.

### Evening events.

On two evenings, we were able to celebrate with our guests from near and far. The evening events kicked off with a look back at 50 years of ABI and a look ahead to the future.  
(from left Christian Heichel, Thomas Merz)

### Fundraising campaign.

Instead of bringing us gifts, our guests donated to the "Hilfe in Not Obernburg" foundation, ABI topped up the sum to 10,000 euros. Handover of the cheque to Dr. Eberhard Kroth, Chairman of the Foundation, by Christian Heichel, Managing Director of ABI.  
Many thanks to all the donors!

### Factory tours.

The factory tours took place in plant 2, Boschstraße 2, in the welding shop and the mechanical workshop, and in plant 3, Am Knüchel 4, in the paint shop, final assembly and attachment assembly facilities. The ABI employees told interesting facts about ABI and the development at the Niedernberg site.

### Family afternoon.

On Friday afternoon, 13.09.2024, we also invited the families of our employees so that they could get an idea of what ABI produces and, above all, what ABI is all about. The machine demonstrations were met with great interest.

Trainee corner.

ABI is also a training company and the trainees were able to show their families what they are learning here.

Fun for young and old.

In addition to culinary delights, there was also table football, soccer darts and a bouncy castle. It was a successful event.

Dear business partners, employees and friends of ABI,  
As this current year comes to an end we would like to thank you  
for your kind cooperation throughout the year and for placing  
your confidence in us.

We look forward to working together on many joint projects and  
would like to wish you every success for the coming New Year.
